Otti Berger: Weaving for Modernist Architecture

Judith Raum

Otti Berger created fabrics that fundamentally changed the understanding of what textiles could be and do. A core member of the experimental approach to textiles at the Bauhaus, she also was a female entrepreneur in the frenzied time that was the early 1930s in Berlin. Working closely with architects, she designed upholstery and wall tapestries, curtains and floor coverings that responded to novel types of use and production methods, and thereby redefined the relationship between aesthetics and function – with fascinating results. The book offers an entirely new perspective that emphasizes the craftsmanship and entrepreneurial side of her work, and appreciates the largely unrecognized significance of textiles in the history of architecture and design.
